The Board of Directors
Our 5-Year Governance Review
Our Former Governance Model
Our Future State

- Light - maneuverable
- Based on efficient use of energy
- Requires coordination - communication
- Leader is in the back
- Do not pollute - good morals
- Must move forward as one

- Fast: Go anywhere
- Nimble: Reliable
- Can't do anything by itself
- Requires effort, brain, heart, muscle
Our 5-Year Review

Staying Connected
The Board’s Engagement with AAMC Affinity Groups

- Attending spring Council meetings
- Hosting a spring webinar for affinity group leaders to hear AAMC updates
- Reviewing affinity group update reports at in-person Board meetings
- Convening affinity group chairs at the Annual Meeting
- Visiting Council administrative board meetings

Goodbyes and Good Wishes for Tony!

Tony Mazzaschi
Senior Director, Scientific Affairs
We Face Growing Challenges

Are we going to lose a whole generation of scientists?

When will residency slots increase?

Is our business model sustainable?

We talk about interprofessional teams, but how do we put them together?

Is our commitment to diversity fading?

Given our new partnerships, is our core academic mission changing?

What does it mean to be a faculty member in the future?
AAMC Groups Addressing These Challenges

Partnerships between CFAS, GFA, GWIMS, and GDI are addressing pressing questions

- Given changes to AHC structures, what will “faculty” mean in the future?
- How do we ensure a well-prepared and diverse next generation of leaders in academic medicine?
- How can we help support faculty in achieving scholarship, including alternative forms of scholarship?
- What is our role in promoting the value of academic medicine and assuring it’s sustainability?
A Challenge for the Entire AAMC

Current Activities of AAMC’s Strategic Approach to GME

Sustainable Funding

Physician Workforce Composition

Preparation of the Physician Workforce
Current Activities of AAMC’s Strategic Approach to GME

Sustainable Funding
- Continue legislative and regulatory advocacy for additional positions
- Help member institutions understand their own GME costs
- Inventory and assess innovative GME funding streams (beyond current sources)

Physician Workforce Composition
- Conduct assessment of specialty mix, geographic distribution, diversity, and other trends of residents, and member institutions’ contributions to the healthcare workforce
- Work with the VA to ensure successful GME partnerships are utilized to full potential

Preparation of the Physician Workforce
- Work to maximize the match rate for members’ students
- Address the gaps in preparation for practice (e.g., IPE, quality, high value care, systems based practice)
- Leverage a true continuum of education (e.g. core EPAs, EPAC, accountabilities)
- Prepare faculty for their roles

The Challenges You’re Facing

Are the number of graduate students and postdocs I recruit based on the needs of my lab, or future career opportunities for these trainees?

Is reducing health care costs someone else’s problem or my chance to lead?
Major Changes for the AAMC
Chief Medical Education Officer
Carol Aschenbrener To Retire in 2014

Americans’ Advice for Training Good Doctors

- Practice good/better bedside manners
- Listen to your patients
- Put the patients first
- Be easier to talk to/communicate better
- Spend more time with patients
- Do more research when uncertain of the diagnosis
- Be able to communicate effectively with patients
- Stay up-to-date on current research
- Work as a team with other doctors, nurses, and hospital staff
Advocating for Medical Schools and Teaching Hospitals

AAMC Priorities for 2014:

- Sustain funding for medical research and GME
- Fix the SGR
- Preserve the ability to provide high-quality care to all populations
- Address the doctor shortage
- Implement the ACA
Let’s talk about what’s on your mind
